About This Content

Prior to version 120.3 this only contains pak128.japan
From version 120.3 onwards...

Containing 3 Different Pak Sets:

pak.Nippon (64 size)

...

pak64.japan

Pak64.Japan evolved from pak64 after original images were replaced by Japanese versions. You will see typical Japanese architecture and vehicles (yes! It includes the famous shinkansens!), transport rice and electronics, and, the most important, you will drive on the left.

pak128.japan

The Japanese community has always built many great objects for Simutrans. However, it was felt, that the scale of pak64 did not meet the desired level of detail. Thus pak128.Japan was designed. Trains, especially, are enhanced compared to the standard size and the graphic consistence makes this pak a work of art.
