About This Game

Through faster-than-light technology, nations strive to colonize the universe while fighting for control and freedom throughout space. Play as mercenary Acero Astra, hired to defend and escort a space convoy from destruction. Pilot the prototype Valkyrie mecha on land, sea, and air to neutralize opposing forces. You must interact with characters, machines, and the environment to achieve your objectives and progress throughout the game.

Game Features

- Explore a sci-fi setting with a cyberpunk twist.
- Battle numerous enemies in kinetic, run-and-gun fashion on foot and in vehicles.
- Journey to different locations as you fulfill Space Force missions.
- Auto-save system will help record your progress.
- Your actions may affect NPC interactions.

Really like the art stlye for game,that is the reason i bought the game...trust me, i give alot of patience to this game,but too many bug to keep stopping me finish the whole game... Especially the air combat mission,i really want to ask the Dev did they even try this game on different computer? some stage lack on introduction, u dont really know what you looking for until you run around all dead-end to find the object. Some stage even u interactive the a terminal will cause u cant move the chracter.. and some cut scene just like show up random because it didnt edited well. The only reason this is getting a neg review is because it dont work,if i get it work I will be more than happy to change the review.. doesnt work but i dont like give a neg cause its a good game

ill wait for updates. will break your PC. For an early access game it does have its share of bugs and such but the atmosphere is just great. I love the setting and the feel of the game. Combat needs work and it definitely needs polishing but it is ea and in time im sure it will be a big seller.

Nice Early Access Game & I Like The Art Style... Great game and developer is super nice :). bad game . it's full of bugs and it's stupid .
